

INVEST IN AMERICAN BROADBAND NETWORKS

The broadband revolution is accelerating across the U.S., backed by unprecedented federal broadband grant funding. The Millennium Infrastructure Fund breaks new ground by bridging the needs of today to the expectations of tomorrow. Our goal is to connect future-focused network owners with a proven reputation for leadership to visionary, accredited investors who have the foresight to see where the broadband industry is heading. Together, we will provide up-front capital to support the construction of fiber optic networks across America.

Make More Opportunity Happen

Investors in the Millennium Infrastructure Fund realize an ROI north of 12% and become part of a cycle where industry growth can be repeated as we continuously innovate towards more opportunity.

WHO QUALIFIES FOR FUNDING?

The Millennium Infrastructure Fund seeks network owners with a track record for successfully building and operating broadband networks. Some networks have been awarded Local, State, or Federal grants to build areas and drive growth in the community, but federal

funding is not a requirement. We invest with network owners with a combination of quality management, proven infrastructure models, or grants and help them achieve their network growth.

FOR PIONEERING, ACCREDITED INVESTORS

The Millennium Infrastructure Fund empowers civic-minded investors to earn solid returns on projects that positively impact underserved broadband communities across the United States.

Security

A secure place to invest with consistent returns paid quarterly.

Flexibility

A flexible exit timeline (3-5 years) with conventional financing to pay off the fund.

Visibility

An investment with excellent visibility managed by a team with 25+ years in the fiber-optic networks industry.

THE MILLENNIUM ECOSYSTEM SUPPORTS NETWORK OWNERS TO THE LAST MILE

After more than two decades as an industry leader and innovator, Millennium has built and maintained long-term relationships with network owners who have a proven track record of success for building state-of-the-art communications solutions for residential, business, and enterprise users.
